

FORKLIFT TRUCK ATTACHMENT

Forklift Truck Attachment Professional Enterprise

BSC ATTACH

The products produced by BSC Attach are still in production and logistics. We are proving its value by overcoming the harsh environment.

Holding, Moving, Lowering, Pushing, Pulling

These things are simple repetitive tasks that may seem simple, but I have learned from **BSC ATTACH** over 30 years of experience what is important for this simple task to be successful.

BSCATTACH is

With 30 years of experience, bscattach is a company specializing in forklift workspaces that are well-known for their quality and durability economy in more than 10 countries.

BSCATTACH is becoming Korea's No1 forklift attachment company through the establishment of a customized design, fabrication, and rapid maintenance service system that meets the needs of its customers.

Inverta Push Clamp

Function

We'll rotate the cargo on the pallet, we'll retrieve the pallet, we'll push it with pusher. a work device that is loaded into containers and freight cars.

Purpose

Cargo can be shipped without pallets and expensive pallets can be retrieved. It is mainly effective in the logistics of petrochemical products.

Paper Roll Clamp

Function

ARM that rotates 360° clamps and sets up or lies in circular cargo.

Purpose

Paper companies, printing companies, newspapers, etc. to transport goods in roll form to unload and load them. Suitable for.

Bale Clamp

Function

ARM (wing) of various sizes compresses cargo and transports it without a pallet.

Purpose

It is suitable for unloading and loading various products such as paper companies, textile companies, recycled products (paper, rubber plastic) companies, raw cotton and rice straw treatment companies, pulp companies, etc.

Carton Clamp

Function

A thin wide aluminum ARM (wing) that clamps weak cargo, such as carton box, from the side to carry without a pallet.

Purpose

It is effective when handling electronics, confectionery boxes, food boxes and fruit box chemicals that are vulnerable to shock or pressure.

Fork Clamp

Function

The fork of the ba'e clamp is welded instead of the ARM, which allows the selection of the function and clamp function of the fork positioner to be performed.

Purpose

Since the gap of fork can be adjusted freely, it is easy to transport long iron cargo long wood cargo and various sizes of pallet cargo when used as a clamp and as a fork positioner function.

Turn a Load Clamp

Function

A device consisting of two fork ARMs for parrett and clamping the cargo on the pallet to rotate left and right.

Purpose

It is a work device for exchanging production and shipping pallets and is also used to pour out contents in plastic or steel containers.

Drum Clamp

Function

The ARM (wing) for the half-moon drum moves by clamping on both sides through the cylinder on the left and right. One, two, or four can be handled depending on the purpose of the work.

Purpose

handling of drums and similar cylindrical cargo (chemical products, beverage solutions, paints, ink, adhesives, waste disposal)

Block Clamp

Function

Move brick-like cargo without pallet to ARM (wing) with rubber plate attached.

Purpose

Move building material items such as concrete blocks and bricks.

Load Stabilizer

Function

A working device that prevents the cylinder from shaking and collapsing while it is moving by pressing the product on the pressure plate at the top.

Purpose

Used to handle 1 pallet, 2 pallet and 3 pallets in beverage company, glass factory corrugated company, pharmaceutical company appliance company.

Hinged Fork

Function

The two hydraulic cylinders greatly tilt the fork to the upper 35 degrees lower 45 degrees, allowing for the transport and loading of cylindrical cargo.

Purpose

Effective in raw wood, cement pipes, pipes, bricks and loading operations.

Hinged Bucket

Function

Buckets are attached to the hinged fork to act as small rotor. Bucket is It can be removable, and it can also be used as a normal fork after removing buckets.

Purpose

Suitable for cargo transport or unloading in raw material conditions such as sand, cement, grain, salt, waste, etc.

Rotating Fork

Function

360 degree fork rotates left and right, pouring cargo into containers, and palette works like a regular forklift.

Purpose

It is suitable for unloading and transporting powder and useful (liquid) objects such as machinery processing plants (chip) processing, waste treatment companies, feed company food company and casting company.

Multi Pallet Handler

Function

You can use two pallets side by side by side by side by opening the fork, and you can work with a common one in the forklift width.

Purpose

It is easy to place a place in loading cargo and is suitable for improving the efficiency of forklift work in container cargo operations, and is also used by general palette handling companies to increase productivity. (drink company, home appliance company, petrochemical company, food company)

Load Pusher

Function

Push the cargo on the fork with the back rest surface to unload.

Purpose

Useful for warehouses that handle goods that are difficult to handle, such as boxed items, etc. that can be deeply loaded, such as containers.

90 ° Coil Upender

Function

Two ARMs are opened and closed simultaneously by the hydraulic cylinder, and can also move left and right to close the product gap while holding the product, and a square rubber pad at the end of the ARM can be rotated 90 degrees by the hydraulic cylinder to set up and lay the product.

Purpose

Coil steel production company, large tire production and repair company

Hinged Bucket Grapple

Function

Used to drive waste materials and recycled plastic up and down by attaching a bucket with grapple to the hinging fork function.

Purpose

recycling company
